

Practicing Right Hand Finger-style Technique

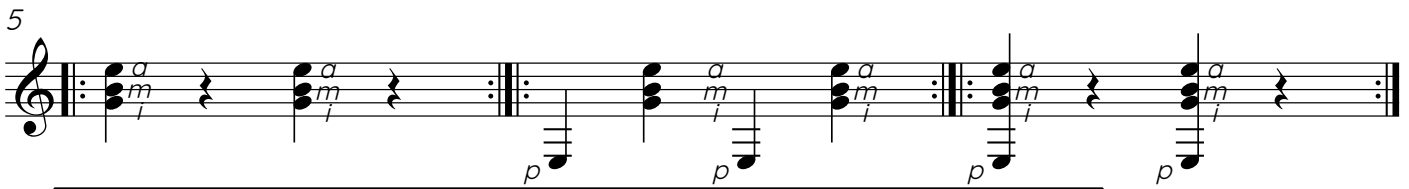

Jason Ennis

Open strings:

- 1) Begin with fingers planted on the low E, G, B and high E strings.
- 2) Keep hand neutral and relaxed, only enough flexion in wrist so that finger misses adjacent string.
- 3) Move from the big joint and let the finger spring back passively. Remember, p "pushes" to outside of i and i, m, and a move as if trying to touch wrist.
- 4) Prepare by planting lightly on 1/4 rest.
- 5) Practice each finger slowly for 30-60 seconds, pausing to reset after every 6-8 repetitions.

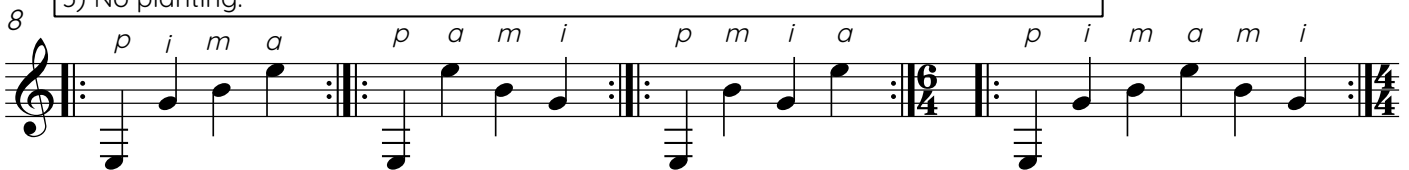

Chords: Follow same instructions as above. Try with p on A and D strings.

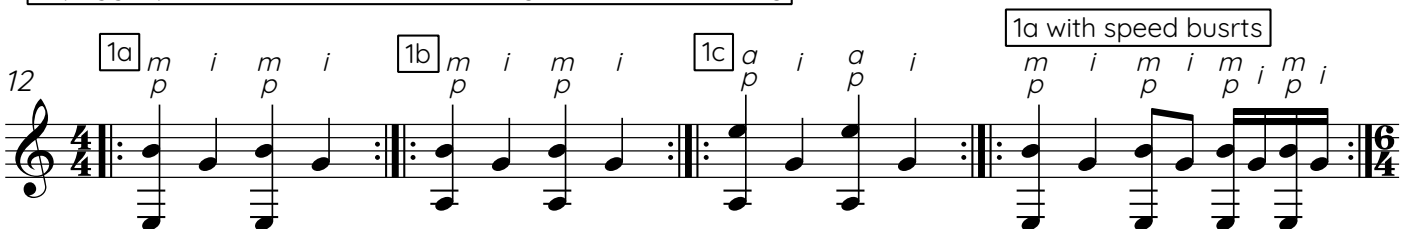

Arpeggios. Practice three ways:

- 1) Pre-planting: plant all fingers together on last 1/8 note of measure, when possible.
- 2) Sequential planting: each finger plants immediately after previous finger plucks.
- 3) No planting.

Arpeggio patterns used in "Blackbird" by Lennon/McCartney

Pattern 2 with simplified rhythm

Pattern 2 in rhythm

Applying arpeggios to musical excerpt (first 2 bars of "Blackbird"): Begin by working out LH fingerings as "block chords," isolating challenges First, alternate 1/4 on, 1/4 note rest ("pulsing"), then as legato 1/2 notes.

TAB

'A' section of "Blackbird:"

First work out and practice LH fingerings with block chords, Then add RH patterns. Use pattern 1 for 1/4 notes, pattern 2 for 1/2 and whole notes. Hint: 4th finger of LH is "guide."
